JOHN HAMPDEN PLEASANTS is dead! He died this morning at 2 o'clock, of the wounds indicted upon his person by Thomas littering, Ir. in their recent remonstration. The mean the facts to be substantially as follows. The quarrel had gone on in their newspapers to such an extent that Mr. Pleasants thought himself called upon to bring the matter to a crisis. He therefore sent a request to Mr. Richie to meet him at a specified place and hour scross the river from Richmond with side arms. Mr. Richie sent word back that he could not consent to set the staff in that way. Mr. Pleasants then sent him word that the matter must be settled, and in that way.

Mr. Richie then prepared himself with a revolver of six barrels, two duelling pistois, and a horseman's short sword, and repaired to the place designated, with two for

sword, and repared to the place designation, the thin samed.

Mr. Pleasants, who had not arrived, with two (er four—there is doubt about this) common pistols and a gword-case. A friend of Mr. Pleasants approached Mr. Ritchle, and said to him, that he thought the difficulty might be settled if the latter would do one thing, and that was, to acknowledge that he believed Mr. Pleasants to be a brave man. Mr. Ritchle replied that once he could have done this; but now, Mr. Pleasants baring called him there, and not appearing imited, he could not make such an acanowledgment. Mr. Pleasants friend then informed him that he presumed he would have to fight. Mr. Ritchle replied, very well, he had come there to meet Mr. Pleasants. The friend of the latter left the spot and went to his principal, who was not far off. Soon after this, Mr. Pleasants appeared approaching Mr. Ritchle, considerably in auvance of the two friends who had accompanied him to the spot. As he approached at a rapid pace, Mr. Ritchle fired auccessively his two duelling pistols, resting each on his left arm, drawn up in anangle for that purpose. He then presented his revolver and fired differ four or five of its barrels. After he had fired first upon Mr. Pleasants, the latter drew and fired thrice without effect, all the time rushing up to Mr. Ritchle, and when near enough he struck him with his sword cane, when the scabbard flew off, and Mr. Ritchle struck up the blade or spear with his short aword—in doing which he received the point of Mr. Pleasants spear in the corner of frist mouth, cutting upward a slight gash.

Mr. Pleasants then fell, having received five wounds from the pistol shots oi his antagonist, if not one from his short sword. One ball raked across the back of his left hand, carrying away all the muscles and tendons leading to the fingers—another passed through the fieshy part of his left arm, half way up from the ethow to the shoulder—another entered the left green and proved mortal. The itth wound was in the right thigh, either by a ball

PRISON ASSOCIATION.—The meeting at the Assembly Chamber last evening, was large and animated. John Townsend was called to the chair, and Messrs. Rhoades, Taber and Randall, appointed Secretaries. Mr. Hopper and Mr. Butler of New York, addressed the meeting, and appropriate resolutions were adopted. The subject of Prison Discipline is evidently becoming one of increasing and absorbing interest.

The Stock Market is still heavy, although the changes are not material, excepting in Vicksburg, which ell off from 82 to 7. This decline was occasioned by rumore that a writ of Quo Warranto had been obtained by a large debtor of the bank, whose property was about to be sold under execution. The letter containing this in-formation expressed a fear that the bank would be condemned if brought to trisi, and the residium of assets forfeited. This fear, however, does not agree very well with the intelligence received a few days since, that the Briscoe amendment had been sustained by both Legisla-ture and Courts. This amendment explicitly secures to the stockholders the assets if there should be any after the debts of the Company are paid. Probably later in-telligence will put this matter in a different light.

the subject:

The continued and rapid falling off in the receipts this year, compared with the same period last season, and even the year before, compels us to admit that our estimate of the 29th November last, of 2,300 m. bales, now appears decidedly too high; at the time it was put forth, however, it was deemed by most people from 100 to 150,000 bales too low; the same parties, at this time, with quite unimportant exceptions, are satisfied that this is an outside estimate, while many well-informed and prudent men actually set down two millions as the fairest and

PRISON Association.—The meeting at the As. | most probable estimate. To enable our friends to form most probable estimate. To enable our friends to form their own conclusions upon the best data in our reach, we have prepared the annexed tables, by which it will be seen that for the last five years, the proportion of the crop received to the latest dates, has averaged 539 per cont, of the year's production, and that in 1841 (the year the receipts were delayed the longest in consequence of an expected desidency of 500 m base from the previous crop), the amount received was 551 per cont. It will also be seen by reference to our annual circulars of the 11th and 12th Sept. 1845 and '44, that the receipts for the months of March were, with the exception of one month (a preceding one) the heaviest month's receipts in each year. We notice this fact to show that the present deficiency is likely to be an increasing one, at all events for many weeks to come. It is also worthy of remark that the stocks in the laterior towns are less than in the last two years, which seems to discourage the idea that much

On the 20th inst the letters, &c. per "Cambria" were received, and their tenor in relation to cotton created considerable disappointment; an advance had been confidently looked for by the steamer, and many parties had held their stock in anticipation of favorable accounts. The sales on Friday and Saturday were to a mere nominal extent, and some effort was made to depress prices, notwithstanding which, holders remained very firm, and refused to make any concession from previous rates. The market closed quietly, after sales of 7,000 bales for the week.

Early on Monday morning of the present week pur-

Cosed quiety, after sales of 7,000 bales for the week.

Early on Monday morning of the present week purchasers entered the market freely, and a large business. barry on Monday morning of the present week purchasers entered the market freely, and a large business, compared with the average transactions of the past six months, has been daily transacted since, as follows: on Monday, 2,500 bales: Tuesday, 2,000; Wednesday, 3,000; Thursday, 1,200; and yesterday, 1,000—making a total for the week of 9,700 bales, of which about 2,500 were taken for Liverpool, 4000 for France and the Continent, and the remainder for consumption and on speculiation, including one list of about 450 bales of New Orleans, at 9½c, per lb, ranking for a strict Liverpool classification, "fully fair." The demand has not been confined to any particular quality, but has been general on all grades, the preference being given, however, to "middling fair" and "fair," the market being almost entirely swept of these descriptions, particularly of Mobile and New Orleans, for a strict classification of which our outside quotations could readily be obtained. Prices have advanced during the week fully 2,20c, per lb, and we find we are obliged to raise our quotations of the 16th inst. half a cent per lb, to conform with the prices pald during the last two days.

It will be seen that we estimate the stock of Cotton in

ib to conform with the prices pald during the last two days.

It will be seen that we estimate the stock of Cotton in the city as "on hand and on shipboard not cleared" at 30,000 bales; of this amount we do not think that more than one half is in first hands or on sale. It will also be seen by reference to our table of quotations above, that we have given a separate grade of prices for Florida Cottons, as we find it difficult to class them either with Uplands, or Mobiles and New-Orleans, they being preferred, particularly when coming from St. Marks, to the former, and not bringing as much as the latter, except in isolated cases of "fine" crops. We shall in future continue to quote them separately, and endeavor to obtain for Florida Cotton its proper station in the Cotton family. Statement, showing the Receipts of Cotton in all the parts of the United States, from 1st September to dates, for the last six years.

N. B.—An advertisement of removal from my office, user the signature of Joim Burdell, has appeared in the public papers, which might less some of my patrons to believe that I had removed; which alone, however, would not have called forth any notice from me, had not this same person, in concluding his removal notice, offered the following institution in reference to my own capabilities as a Dortist. "For the last two or three years many of his friends have been misled, and he has had to bear the responsibility of operations not done by himself, which he will endeavor to correct heresfier." If the above quofation from J. B. advertisement has reference to me, it is folse in the unintest particular. Yet it is a fact, that I am constantly performing operations for the old patrons of J. B. which services had not been in the first instance property or judiciously performed by and J. B. such patrons refusing to re-apply to him, because they considered him insanc. Several years since, when J. B. was engaged in a very extensive practice in Chamber-ast, he was considered as econd only, in point of dennal reputation, to such Dentiste as Dr. E. Dr. N. Jackson—Ber Sir—You inquired of me what benefit I had d-rived from the use of your Pile Embrocation. I feel bound to state to you that I have been afflicted with that very troublesome and distressing disease, the Piles, for the last ten or tweive years, and mine was a case of the most painful kind, othen obtaining me to give up hashness. I had irred almost every kind of medicine recommended for the cure of Piles and with with replice benefit, when, during the last fail, I heard of several persons who had been ented by the use of your Embrocation, and finally was induced myself to try it. After using part of a bottle I was entirely reflevel, and have had no indications of a return of the disease. The cure, I have every remon to believe to permanent. If it was for the any advantage to those who are similarly afflicted, you can use this note for that purpose, and may also reforming the to me who may wish terther information on the subject. Littannative, and the state of the Alley and the part of the Carney and the part of the Alley and the All THE MUTUAL LIFE INSURANCE Company of New-York, No. 56 Wall-st—Net amount of accumulated premiums, \$315,571—This Company is organized on the purely initial principle, and its business is restricted by the charter to the insurance of lives and granting annulties and endowments.

It commenced, without capital, on the 1st of February, 1345. It had issued 1085 policies, and its not accumulated premiums was \$97,778. At the termination of the third year, on the 3ist January, 1346, the whole number of policies issued was \$133, and is net accumulated premiums was \$97,778. At the termination of the third year, on the 3ist January, 1346, the whole number of policies issued was \$133, and is net accumulated premiums, after paying all losses and expenses, was \$215,571, thus exhibiting an increase during the last year of 1447 policies issued, and \$113,233 of accumulated funds, which is rapidly augmenting by an annual income of \$25,000, growing out of original and renewed premiums and interest on investments.

This extraordinary access places the company in a strong position, and it now anks among the safest institutions in the country.

Policy-holders participate in the whole of the profits, there being no proprietary interest or subscribed capital to absorb any portion thereof. An extensive and prosperous business promises large dividends on the first division of profits on the ist February, 318, and persons now insuring will share in these profits if they survive that period.

The premiums are paid annually, and are as low as any American Company, and lower than the English, with a participation is the profits. Folly-holders are secured by investment in bonds and mortgages on real estate in the city of New-York and Brooklyn, worth double the amount to and thereon, and in stocks of the State and City of New-York.

city of Newtoaned thereon, and in stocks of the State and City of Newyork.

The transactions of this Company are on the cash principle—consequently the survivors of parties insuring with it
will not be subjected to the heavy drawback of accumulated premium notes, reducing the benefit of the assurance to
a small pittance.

Persons may effect insurance on their own lives and the
lives of others. A married woman can insure the life of her
